

Your own private connection

Cloud Connect is a private connection that bypasses the public Internet – giving a high level of security and reliability

Design flexibility

Greater flexibility across multiple clouds and between data centers - customer single port to multiple providers

Get what you buy

Reduce data egress charges. We offer a pricing model that accommodates customers' changeable bandwidth needs

Maximum security

Full confidence to meet security and compliance standards

Maximize existing interconnection

Connect to your CSP via Arelion's fully owned IP backbone

Greater scalability

Adjust bandwidth simply using our online portal

Controlled Cloud-connectivity

Accelerate network performance with an abundance of capacity

Resilient by nature

Cloud Connect offers a range of diversity options and SLAs
